1000's of free tissue samples,
ready to use, made available by
SEARCHBreast researchers

Samples from
over 25 different
mouse models

Material derived from xenograft, allograft, and genetic (GEM) models of breast cancer.

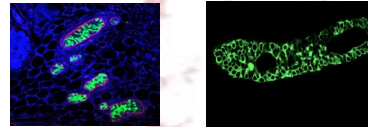

Many types of
tissue available

Tumours, mammary glands,
mammary epithelial cells, lung
metastasis, liver, brain, & bone.

Samples ready
for use

Most samples available as paraffin
embedded blocks or histological slides.

Samples well
characterised

GEM alleles, background strain,
cell lines, metastatic sites &
penetrance, transplantation sites, &
ER/PR/HER2/CK5/CK8/p63/SMA status.
